ServiceNow greatly reduced costs while improving productivity with Join NaaS. Our NaaS solution comes with our best-in-class network, digital collaboration spaces, and powerful environmental monitoring.

ServiceNow is accelerating its transition to an agile approach to branch offices and hybrid work leveraging Join.

With our major upgrades to their digital office, ServiceNow is attracting employees to satellite offices with more advanced capabilities and integrated collaborative tools. Powering these spaces as a service preserves their agility to manage their workplace portfolio in step with market demands.

At the same time, by leveraging Join NaaS, ServiceNow is a leader among enterprises using technology to lower costs and increase productivity over time.

OUR SOLUTION

In one simplified service, Join provides all IT services at satellite offices, including high-speed WiFi, our zero-touch, zero-CapEx secure network for employees and guests, customized A/V and collaboration technology, and printer service.

To optimize their spaces and enhance employee experiences, our network-integrated Workplace Analytics delivers real-time environmental quality, occupancy and space utilization data.

Using Network-as-a-Service, ServiceNow sees the immediate benefits operating IT as pure OpEx. Futureproofing the workplace, our evergreen technology stack will further reduce costs over time while continually optimizing performance.
Every service is easily expandable, adding new technologies to distributed workplaces, all with unmatched support.

KEY OUTCOMES ACHIEVED

— Reduced commute times for employees
— Increased confidence of environmental quality
— Improved occupancy and usage data for all spaces
— Better investment decisions
— Built-in digital features for hybrid work
— Reduced costs while optimizing performance

Transition, simplify, and automate your network with Join NaaS
